canceled

28. (Amended) The article of manufacture of claim 27, further comprising:

executing a query on the reference extensible markup language document to generate the list and the link without a user having to request the query.

---

IN THE ABSTRACT SECTION

Please substitute the abstract paragraph on page 55, with the following abstract paragraph.

---

A method, apparatus, and system exist to generate a ranked list of one or more related documents and a link to each of the one or more related documents. The one or more related documents are ranked based upon relevance to the first representation of content associated with one or more specified fields of the reference extensible markup language document.
